

MISSION

The Mission of Providence Engineering Corporation is to provide reliable solutions that are constructible, affordable and timely, resulting in our being the Engineer of Choice.

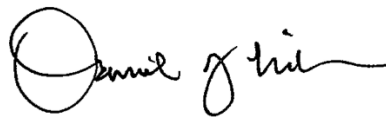

BELIEFS

In order to achieve this mission, we operate on a set of beliefs and values that serves our Clients, our Co-workers and ultimately our Corporation. These beliefs are core to our current and long-term success.

1. We believe that both the opportunities for work that we receive and our given abilities to do that work are gifts from God. We will honor those gifts by offering our best efforts on our Clients' behalf, with appreciation for those opportunities.
2. We believe that we can best serve our Clients by associating with them closely and by taking on their problems as our own.
3. We believe that quality, cost and schedule are all important to our Clients.
4. Quality -- We commit to improve our skills, our understanding of our Client's needs, and our knowledge of available solutions to those needs.
5. Cost -- We commit to maintain our cost effectiveness through operational simplicity and design efficiency.
6. Schedule -- We commit to meet our Clients' schedule requirements wherever possible.
7. We believe that as we care for the needs of our Corporation, so our Corporation will be able to care for both our Clients' needs and our Co-workers needs.
8. We commit to maintaining a workplace in which our Co-workers are able to enjoy their work and to grow professionally and personally, with our respect and support.
9. We commit to being forthright and to deal with all in good faith.

David W. Bernhardt,
President

Daniel J. Fichtner, P.E.
